Aleksander Palamar

Desenvolvedor Full Stack | Especialista em JavaScript, React, Next.js & Node.js

Curitiba, Paraná, Brasil

Resumo

Hi there! I'm Palamar, a technology enthusiast with solid experience in software development. I've been working with programming since 2016 and have been dedicated to honing my skills in JavaScript, React, Next.js, and Node.js ever since.

With a strong background in web development, I'm always seeking new challenges and opportunities to apply my knowledge and creativity. My passion for programming has led me to explore various areas within the JavaScript ecosystem, from building interactive interfaces with React to creating scalable applications with Node.js.

Currently, I'm focused on developing projects using the latest technologies, such as Next.js, which allows me to efficiently create modern and performant web applications.

In addition to my technical work, I'm a strong advocate for continuous learning and teamwork. I'm always willing to share my knowledge and learn from others, believing that this exchange is essential for both professional and personal growth.

If you're looking for a developer passionate about JavaScript and its technologies, I'm ready to collaborate on challenging and innovative projects. Let's work together to turn ideas into reality!
